TECHNICAL SUMMARY

Software Engineer with hands-on experience in building scalable backend services and modern mobile applications. Proficient in **Java Full Stack development** using Spring Boot, Microservices, RESTful APIs, and MySQL, along with strong expertise in **iOS application development** using Swift, SwiftUI, and UIKit. Experienced in designing clean architectures, integrating APIs, and delivering high-quality solutions in Agile environments using Git, Postman, and CI/CD pipelines.

EXPERIENCE

Software Engineer Consultant
Encora

August 2025 – Present

Working as a Software Engineer Consultant at Encora, where I completed training in **Java Full Stack Development** and was subsequently deployed to **ANZ Bank** as an **iOS Developer**. I contribute to building production-grade iOS applications using **Swift and SwiftUI**, while following Agile practices and enterprise development standards.

SKILLS

Languages: Java, Swift, JavaScript, Python, SQL

Mobile Development: SwiftUI, UIKit, iOS SDK

Frameworks: Spring Boot, Spring MVC, JPA, ReactJS, Node.js, Express.js

Technologies: Microservices, REST APIs, MySQL, Kafka, Git, Postman

Cloud & Tools: AWS, Eclipse, Xcode, VS Code, MySQL Workbench

Additional Skills: JUnit, Mockito, API Testing, Problem Solving

CERTIFICATIONS

AWS Cloud Practitioner [[January 2024](#)]

Ethnus MERN Full Stack [[December 2023](#)]

PROJECTS

Ecommerce Kafka Microservices Application

[GitHub Repository](#)

- Built a distributed backend system consisting of **Order**, **Stock**, and **Email** microservices communicating asynchronously through **Kafka topics**.
- Developed CRUD-based REST APIs using **Spring Boot**, **JPA/Hibernate**, and **MySQL**.
- Ensured modularity, scalability, and fault isolation through independent service deployments.

Deepfake Detection System — Machine Learning [Python | Flask | EJS]

— [repo link](#)

- Streamlined a deepfake detection model using CNN-LSTM to identify fake videos with >90% accuracy.
- Built a full-stack web app using Flask and JavaScript for photo upload and prediction, optimizing the processing with efficient frame processing to reduce inference time by ~ 40%.

Inventory Management — Full Stack Group Project [M E R N | Tailwind CSS]

— [repo link](#)

- Collaborated with a team of 5 to implement a Full Stack web application focused on MERN stack.
- Engineered a full-stack inventory management system using MERN stack, improving CRUD efficiency by (approx)30% through optimized MongoDB indexing and JWT-based user authentication.

EDUCATION

Vellore Institute of Technology, Vellore-TN
B.Tech in Information Technology

Sep 2021 – May 2025
CGPA: 8.49/10.0

Tirumala Junior College, Rajahmundry-AP
MPC (Maths, Physics, Chemistry)

Jun 2019 – Apr 2021
CGPA: 8.96/10.0

ADDITIONAL ACTIVITIES

- Core member of the Apple Developers Group (ADG), contributing to UI/UX design using Figma.
- Participated in organizing multiple workshops and technical events, facilitating knowledge sharing.
- Solved 320+ LeetCode problems in Python, earning 4 badges and demonstrating strong DSA proficiency.
